force required to keep an object moving in a curved or circular path. it is directed. Equinox: the point at which ecliptic intersects.

SKIFT ADDRESSE

Pall over the land. derecho: a line of intense, widespread, and fast-moving thunderstorms that moves across a great distance. they are characterized by damaging straight-line winds over

Så stor er risikoen for, at din bolig bliver oversvømmet

Nedenfor kan du få et indtryk af, hvor udsat din bolig er ved oversvømmelse efter skybrud eller stormflod. Du kan klikke på de enkelte forhold for at blive klogere på, hvordan de påvirker risikoen for oversvømmelse.

Man får en generel risikovurdering samt begrundelse for, hvad der trækker op/ned

Man kan vælge mellem skybrud og stormflod (vi kan ændre defaultvisning afhængigt af årstid)

Før man får præsenteret mulige tiltag, har man mulighed for at skrive, om man har fået gjort noget allerede (det afgør de tiltag, man præsenteres for efterfølgende – se næste slide)
